

In the Claims

Please amend claim 1 as follows:

---

1. (Twice amended) A television program guide system implemented on user television equipment, comprising:

B1 means for providing an option for a user to create a preference profile that is indicative of the user's television programming interests; and

means for displaying a hot list of programs on the user television equipment, wherein all of the programs on the hot list are based on the preference profile and are substantially currently available for viewing by the user.

---

Please add claims 181-447 as follows:

---

181. (New) The television program guide system of claim 1, wherein the hot list includes at least one program with an active non-expired reminder.

B2 cont 182. (New) The television program guide system of claim 1 further comprising means for allowing the user to tune to a program on the hot list.

183. (New) The television program guide system of claim 1 further comprising means for allowing the user to direct the television program guide system to display the hot list.

184. (New) A method for using a television program guide system implemented on user television equipment, the method comprising:

*Dep  
CMT* providing an option for a user to create a preference profile that is indicative of the user's television programming interests; and

displaying a hot list of programs on the user television equipment, wherein the programs on the hot list are based on the user's preference profile and are substantially currently available for viewing by the user.

185. (New) The method of claim 184 wherein providing the option for the user to create the preference profile further comprises:

providing an option for the user to select a plurality of preference attributes that are indicative of the user's television programming interests; and

providing an option for the user to select one of at least several preference levels for each of the

plurality of selected preference attributes, wherein the selected preference attributes and the selected preference levels are associated with the preference profile.

186. (New) The method of claim 185 further comprising providing an option of selecting a preference scope that is associated with the preference profile.

*By  
cont*

187. (New) The method of claim 185 wherein there are multiple profiles, the method further comprising providing an option of selecting which of the profiles to make active.

188. (New) The method of claim 187 further comprising turning on an auto-reminders feature.

189. (New) The method of claim 188 wherein a given one of the profiles is active, the method further comprising displaying automatic reminders when the auto-reminders feature is turned on based on the active profile just prior to the scheduled broadcast times of programs satisfying the active profile.

190. (New) The method of claim 189 further comprising:

providing a view now option for programs for which automatic reminders are displayed; and

tuning to a given one of the programs for which the automatic reminders are displayed when the user selects the view now option for that program.

*By  
cont*

191. (New) The method of claim 187 wherein at least two of the preference profiles are active, and wherein displaying the hot list of programs based on the at least two preference profiles further comprises indicating which of the programs in the hot list of programs satisfy which of the preference profiles.

192. (New) The method of claim 191 wherein indicating comprises listing the programs that satisfy one of the two profiles using one color and the programs that satisfy the other of the two profiles using another color.

193. (New) The method of claim 191 wherein indicating comprises listing the programs that satisfy one of the two profiles using one pattern and the programs that

satisfy the other of the two profiles using another pattern.

194. (New) The method of claim 191 wherein indicating comprises listing the programs that satisfy one of the two profiles using one icon and the programs that satisfy the other of the two profiles using another icon.

*B2  
cont*  
195. (New) The method of claim 187 wherein displaying the hot list of programs further comprises displaying the hot list of programs based on the multiple profiles.

196. (New) The method of claim 187 further comprising allowing tuning to certain channels based on the multiple profiles.

197. (New) The method of claim 184 further comprising allowing the user to tune to a selected program, wherein providing the option of creating the preference profile further comprises creating the preference profile based on characteristics of the selected program.

198. (New) The method of claim 197 wherein creating the preference profile based on the characteristics of the selected program further comprises creating the preference profile based on the title of the selected program.

22  
10/15  
199. (New) The method of claim 197 wherein creating the preference profile based on the characteristics of the selected program further comprises creating the preference profile based on the genre of the selected program.

200. (New) The method of claim 197 wherein creating the preference profile based on the characteristics of the selected program further comprises creating the preference profile based on the channel of the selected program.

201. (New) The method of claim 197 wherein creating the preference profile based on the characteristics of the selected program further comprises creating the preference profile based on the rating of the selected program.

202. (New) The method of claim 184 further comprising allowing the user to highlight a given program listing, wherein providing the option of creating the preference profile further comprises creating the preference profile based on characteristics of the highlighted program listing.

203. (New) The method of claim 202 wherein creating the preference profile based on the characteristics of the highlighted program listing further comprises creating the preference profile based on the title of the highlighted program listing.

204. (New) The method of claim 202 wherein creating the preference profile based on the characteristics of the highlighted program listing further comprises creating the preference profile based on the genre of the highlighted program listing.

205. (New) The method of claim 202 wherein creating the preference profile based on the characteristics of the highlighted program listing further comprises creating the preference profile based on the channel of the highlighted program listing.

206. (New) The method of claim 202 wherein creating the preference profile based on the characteristics of the highlighted program listing further comprises creating the preference profile based on the rating of the highlighted program listing.

207. (New) The method of claim 184 further comprising:

allowing the user to tune to a selected program; and

modifying a preference profile with which the selected preference attributes and the selected preference levels are associated based on the characteristics of the selected program.

208. (New) The method of claim 184 further comprising:

allowing the user to highlight a given program listing; and

modifying a preference profile with which the selected preference attributes and the selected preference levels are associated based on the characteristics of the highlighted program listing.

209. (New) The method of claim 184 further comprising providing a profiles display with which the user may modify a preference profile with which the selected preference attributes and the selected preference levels are associated.

210. (New) The method of claim 184 further comprising providing an option for displaying the hot list a short time before the scheduled broadcast times of programs on the hot list and for adjusting this time.

B2  
end

211. (New) The method of claim 184 wherein displaying the hot list further comprises displaying the hot list sorted by start time.

212. (New) The method of claim 184 wherein displaying the hot list further comprises displaying the hot list sorted by channel.

213. (New) The method of claim 210 wherein displaying the hot list further comprises displaying the hot list sorted by priority.

214. (New) The method of claim 213 wherein displaying the hot list sorted by priority further comprises displaying the hot list with pay-per-view programming having highest priority and being listed first.

215. (New) The method of claim 185 further comprising allowing tuning to certain channels based on the selected preference attributes and selected preference levels.

*B2  
cont*  
216. (New) The method of claim 215 further comprising providing an option of specifying a sort order for each of the selected preference attributes.

217. (New) The method of claim 216 further comprising allowing tuning to certain channels based on the specified sort order.

218. (New) The method of claim 184 further comprising monitoring which programs are watched by the user.

219. (New) The method of claim 218 wherein monitoring which programs are watched by the user further

comprises monitoring viewing times, channels, and frequencies.

220. (New) The method of claim 218 further comprising automatically modifying a preference profile based on which programs are watched by the user.

221. (New) The method of claim 220 further comprising providing an opportunity to review and modify automatic profile modifications made by the step of automatically modifying.

B7  
cont

222. (New) The method of claim 220 further comprising disabling the step of automatically modifying.

223. (New) The method of claim 184 further comprising providing a personal identification number setup screen.

224. (New) The method of claim 223 wherein providing the personal identification number setup screen further comprises providing a plurality of personal identification number options associated with a preference profile.

225. (New) The method of claim 224 wherein providing the personal identification number options further comprises setting whether a personal identification number is required for activating the profile.

226. (New) The method of claim 224 wherein providing the personal identification number options further comprises setting whether a personal identification number is required for deactivating the profile.

*B2  
cont*  
227. (New) The method of claim 185 further comprising providing a personal identification number setup screen, wherein providing the personal identification number options further comprises:

providing a plurality of personal identification number options associated with a preference profile with which the selected preference attributes and the selected preference levels are associated; and

setting whether a personal identification number is required for viewing which preference attributes are associated with the profile.

228. (New) The method of claim 185 further comprising providing a personal identification number setup screen, wherein providing the personal identification number options further comprises:

providing a plurality of personal identification number options associated with a preference profile with which the selected preference attributes and the selected preference levels are associated; and

setting whether a personal identification number is required for modifying which preference attributes have an associated preference level of illegal.

B7  
cont

229. (New) The method of claim 185 further comprising providing a personal identification number setup screen, wherein providing the personal identification number options further comprises:

providing a plurality of personal identification number options associated with a preference profile with which the selected preference attributes and the selected preference levels are associated; and

setting whether a personal identification number is required for modifying which preference attributes have an associated preference level of mandatory.

230. (New) The method of claim 185 further comprising providing a personal identification number setup screen, wherein providing the personal identification number options further comprises:

providing a plurality of personal identification number options associated with a preference profile with which the selected preference attributes and the selected preference levels are associated; and

setting whether a personal identification number is required for modifying like and dislike preference levels.

B7  
cont

231. (New) The method of claim 185 wherein providing the option for the user to select a plurality of preference attributes further comprises providing an option of selecting a given airing of a program as a preference attribute.

232. (New) The method of claim 231 further comprising allowing the given airing of the program selected as a preference attribute to expire after the program has been aired.

233. (New) The method of claim 185 wherein providing the option for the user to select a plurality of preference attributes further comprises providing an option of selecting a broadcast characteristic as a preference attribute.

234. (New) The method of claim 233 wherein providing the option of selecting a broadcast characteristic as a preference attribute further comprises providing closed-captioning as a preference attribute.

BZ  
ent

235. (New) The method of claim 233 wherein providing the option of selecting a broadcast characteristic as a preference attribute further comprises providing second audio program as a preference attribute.

236. (New) The method of claim 185 further comprising providing an option of specifying a sort order for each of the selected preference attributes.

237. (New) The method of claim 236 further comprising displaying the list of programming based on the specified sort order.

238. (New) The method of claim 185 further comprising providing the user with an option of selecting a preference scope.

239. (New) The method of claim 238 further comprising displaying the list of programming based on the selected preference scope.

B2  
cont

240. (New) The method of claim 238 further comprising allowing tuning to certain channels based on the selected preference scope.

241. (New) The method of claim 238 wherein providing the user with the option of selecting the preference scope further comprises selecting a preference scope selected from the group consisting of: narrow scope, moderate scope, and wide scope.

242. (New) The method of claim 238 wherein the preference levels include like, dislike, illegal, and mandatory, and wherein providing the user with the option of selecting the preference scope further comprises selecting a preference scope that includes liked programs

that are not more disliked and that have all mandatory attributes and no illegal attributes.

243. (New) The method of claim 238 wherein the preference levels include like, dislike, illegal, and mandatory, and wherein providing the user with the option of selecting the preference scope further comprises selecting a preference scope that includes programs that have no disliked preference attributes and that have all mandatory attributes and no illegal attributes.

B2  
Cmt

244. (New) The method of claim 238 wherein the preference levels include like, dislike, illegal, and mandatory, and wherein providing the user with the option of selecting the preference scope further comprises selecting a preference scope that includes programs that have all mandatory attributes and no illegal attributes.

245. (New) The method of claim 185 wherein providing the option for the user to select a plurality of preference attributes further comprises providing an option of selecting a type of channel as a preference attribute.

246. (New) The method of claim 185 wherein providing the option for the user to select a plurality of preference attributes further comprises providing an option of selecting a program series as a preference attribute.

247. (New) The method of claim 185 wherein providing the option for the user to select a plurality of preference attributes further comprises providing an option of selecting a genre of programming as a preference attribute.

B2  
cont

248. (New) The method of claim 185 wherein providing the option for the user to select a plurality of preference attributes further comprises providing an option of selecting at least one rating as a preference attribute.

249. (New) The method of claim 185 wherein providing the option for the user to select a plurality of preference attributes further comprises providing an option of selecting a given actor or actress as a preference attribute.

250. (New) The method of claim 185 wherein providing the option for the user to select a plurality of

preference attributes further comprises providing an option of selecting a given topic as a preference attribute.

251. (New) The method of claim 185 wherein providing the option for the user to select a plurality of preference attributes further comprises providing an option of selecting a word in a program description as a preference attribute.

*By  
me*

252. (New) The method of claim 185 wherein providing the option for the user to select a plurality of preference attributes further comprises providing an option of selecting a given program start time as a preference attribute.

253. (New) The method of claim 185 wherein providing the option for the user to select a plurality of preference attributes further comprises providing an option of selecting a range of broadcast times as a preference attribute.

254. (New) The method of claim 185 wherein providing the option for the user to select a plurality of preference attributes further comprises providing an option

of selecting original programming as a preference attribute.

255. (New) The method of claim 185 wherein providing the option for the user to select a plurality of preference attributes further comprises providing an option of selecting a given language as a preference attribute.

 256. (New) The method of claim 185 wherein providing the option for the user to select a plurality of preference attributes further comprises providing an option of selecting a critics rating as a preference attribute.

257. (New) The method of claim 185 further comprising providing an option of deselecting at least one of the selected preference attributes.

258. (New) The method of claim 185 wherein the preference levels include at least like and dislike.

259. (New) The method of claim 185 wherein the preference levels include at least strong like and weak like.

260. (New) The method of claim 185 wherein the preference levels include at least strong dislike and weak dislike.

261. (New) The method of claim 184 further comprising providing an option for creating a master preference profile.

*Best Conf*  
262. (New) The method of claim 184 wherein a plurality of preference profiles including a master preference profile are active, the method further comprising resolving conflicts between preference profiles in favor of the master preference profile.

263. (New)) The method of claim 184 wherein a master preference profile that is accessed by a master personal identification number is used to define certain television viewing preferences, the method further comprising displaying the hot list of programs based on the master profile.

264. (New) The method of claim 185 wherein a master preference profile that is accessed by a master personal identification number is used to define certain

television viewing preferences, wherein displaying the hot list of programs further comprises displaying the hot list of programs based on selected preference attributes and selected preference levels in the master profile.

265. (New) The method of claim 184 further comprising providing an opportunity for setting non-program settings associated with the preference profile.

*B7C*  
266. (New) The method of claim 184 further comprising providing an opportunity for setting non-program settings associated with the preference profile, wherein the non-program settings include audio settings for the user television equipment.

267. (New) The method of claim 184 further comprising providing an opportunity for setting non-program settings associated with the preference profile, wherein the non-program settings include display settings.

268. (New) The method of claim 184 further comprising:

providing an opportunity for creating multiple preference profiles;

providing an option of selecting which of the profiles to make active; and

providing access to a messaging service based on information on which profile is active.

269. (New) The method of claim 184 wherein the hot list includes at least one program with an active non-expired reminder.

*B2  
cont*  
270. (New) The method of claim 184 further comprising allowing the user to tune to a program on the hot list.

271. (New) The method of claim 184 further comprising allowing the user to direct the television program guide system to display the hot list.

272. (New) A system in which an interactive television program guide is implemented, the system comprising user television equipment configured to:

provide an option for a user to create a preference profile that is indicative of the user's television programming interests; and

display a hot list of programs on the display, wherein the programs on the hot list are based on the user's preference profile and are substantially currently available for viewing by the user.

273. (New) The system of claim 272 wherein the user equipment configured to provide the option for the user to create the preference profile is further configured to:

*B2  
cont* provide an option for the user to select a plurality of preference attributes that are indicative of the user's television programming interests; and

provide an option for the user to select one of at least several preference levels for each of the plurality of selected preference attributes, wherein the selected preference attributes and the selected preference levels are associated with the preference profile.

274. (New) The system of claim 273 wherein the user equipment is further configured to provide an option of selecting a preference scope that is associated with the preference profile.

275. (New) The system of claim 273 wherein there are multiple profiles, wherein the user equipment is further configured to provide an option of selecting which of the profiles to make active.

276. (New) The system of claim 275 wherein the user equipment is further configured to provide turning on an auto-reminders feature.

*By  
end*

277. (New) The system of claim 276 wherein a given one of the profiles is active, wherein the user equipment is further configured to display automatic reminders when the auto-reminders feature is turned on based on the active profile just prior to the scheduled broadcast times of programs satisfying the active profile.

278. (New) The system of claim 277 wherein the user equipment is further configured to:

provide a view now option for programs for which automatic reminders are displayed; and

tune to a given one of the programs for which the automatic reminders are displayed when the user selects the view now option for that program.

279. (New) The system of claim 275 wherein at least two of the preference profiles are active, and wherein the user equipment when configured to display the hot list of programs based on the at least two preference profiles is further configured to indicate which of the programs in the hot list of programs satisfy which of the preference profiles.

 280. (New) The system of claim 279 wherein the user equipment when configured to indicate is further configured to list the programs that satisfy one of the two profiles using one color and the programs that satisfy the other of the two profiles using another color.

281. (New) The system of claim 279 wherein the user equipment when configured to indicate is further configured to list the programs that satisfy one of the two profiles using one pattern and the programs that satisfy the other of the two profiles using another pattern.

282. (New) The system of claim 279 wherein the user equipment when configured to indicate is further configured to list the programs that satisfy one of the two

profiles using one icon and the programs that satisfy the other of the two profiles using another icon.

283. (New) The system of claim 275 wherein the user equipment when configured to display the hot list of programs is further configured to display the hot list of programs based on the multiple profiles.

284. (New) The system of claim 275 wherein the user equipment is further is further configured to allow tuning to certain channels based on the multiple profiles.

285. (New) The system of claim 272 wherein the user equipment is further configured to allow the user to tune to a selected program, wherein the user equipment when configured to provide the option of creating the preference profile is further configured to create the preference profile based on characteristics of the selected program.

286. (New) The system of claim 285 wherein the user equipment when configured to create the preference profile based on the characteristics of the selected program is further configured to create the preference profile based on the title of the selected program.

287. (New) The system of claim 285 wherein the user equipment when configured to create the preference profile based on the characteristics of the selected program is further configured to create the preference profile based on the genre of the selected program.

288. (New) The system of claim 285 wherein the user equipment when configured to create the preference profile based on the characteristics of the selected program is further configured to create the preference profile based on the channel of the selected program.

289. (New) The system of claim 285 wherein the user equipment when configured to create the preference profile based on the characteristics of the selected program further is further configured to create the preference profile based on the rating of the selected program.

290. (New) The system of claim 272 wherein the user equipment is further configured to allow the user to highlight a given program listing, wherein the user equipment when configured to provide the option of creating

the preference profile is further configured to create the preference profile based on characteristics of the highlighted program listing.

291. (New) The system of claim 290 wherein the user equipment when configured to create the preference profile based on the characteristics of the highlighted program listing is further configured to create the preference profile based on the title of the highlighted program listing.

304. (New) The system of claim 303 wherein the user equipment is further configured to provide an option of specifying a sort order for each of the selected preference attributes.

305. (New) The system of claim 304 wherein the user equipment is further configured to allow tuning to certain channels based on the specified sort order.

306. (New) The system of claim 272 wherein the user equipment is further configured to monitor which programs are watched by the user.

307. (New) The system of claim 306 wherein the user equipment when configured to monitor which programs are watched by the user is further configured to monitor viewing times, channels, and frequencies.

308. (New) The system of claim 306 wherein the user equipment is further configured to automatically modify a preference profile based on which programs are watched by the user.

309. (New) The system of claim 308 wherein the user equipment is further configured to provide an opportunity to review and modify automatic profile modifications when configured to automatically modify the preference profile.

310. (New) The system of claim 308 wherein the user equipment is further configured to disable the automatic modification.

311. (New) The system of claim 272 wherein the user equipment is further configured to provide a personal identification number setup screen.

312. (New) The system of claim 311 wherein the user equipment when configured to provide the personal identification number setup screen is further configured to provide a plurality of personal identification number options associated with a preference profile.

313. (New) The system of claim 312 wherein the user equipment when configured to provide the personal identification number options is further configured to set whether a personal identification number is required for activating the profile.

314. (New) The system of claim 312 wherein the user equipment when configured to provide the personal identification number options is further configured to set

whether a personal identification number is required for deactivating the profile.

315. (New) The system of claim 273 wherein the user equipment is further configured to provide a personal identification number setup screen, wherein the user equipment when configured to provide the personal identification number options is further configured to:

provide a plurality of personal identification number options associated with a preference profile with which the selected preference attributes and the selected preference levels are associated; and

set whether a personal identification number is required for viewing which preference attributes are associated with the profile.

316. (New) The system of claim 273 wherein the user equipment is further configured to provide a personal identification number setup screen, wherein the user equipment when configured to provide the personal identification number options is further configured to:

provide a plurality of personal identification number options associated with a preference

profile with which the selected preference attributes and the selected preference levels are associated; and

set whether a personal identification number is required for modifying which preference attributes have an associated preference level of illegal.

317. (New) The system of claim 273 wherein the user equipment is further configured to provide a personal identification number setup screen, wherein the user equipment when configured to provide the personal identification number options is further configured to:

provide a plurality of personal identification number options associated with a preference profile with which the selected preference attributes and the selected preference levels are associated; and

set whether a personal identification number is required for modifying which preference attributes have an associated preference level of mandatory.

318. (New) The system of claim 273 wherein the user equipment is further configured to provide a personal identification number setup screen, wherein the user equipment when configured to provide the personal identification number options is further configured to:

provide a plurality of personal identification number options associated with a preference profile with which the selected preference attributes and the selected preference levels are associated; and

set whether a personal identification number is required for modifying like and dislike preference levels.

319. (New) The system of claim 273 wherein the user equipment when configured to provide the option for the user to select a plurality of preference attributes is further configured to provide an option of selecting a given airing of a program as a preference attribute.

320. (New) The system of claim 319 wherein the user equipment is further configured to allow the given airing of the program selected as a preference attribute to expire after the program has been aired.

321. (New) The system of claim 273 wherein the user equipment when configured to provide the option for the user to select a plurality of preference attributes is further configured to provide an option of selecting a broadcast characteristic as a preference attribute.

322. (New) The system of claim 321 wherein the user equipment when configured to provide the option of selecting a broadcast characteristic as a preference attribute is further configured to provide closed-captioning as a preference attribute.

323. (New) The system of claim 321 wherein the user equipment when configured to provide the option of selecting a broadcast characteristic as a preference attribute is further configured to provide second audio program as a preference attribute.

332. (New) The system of claim 326 wherein the preference levels include like, dislike, illegal, and mandatory, and wherein the user equipment when configured to provide the user with the option of selecting the preference scope is further configured to select a preference scope that includes programs that have all mandatory attributes and no illegal attributes.

333. (New) The system of claim 273 wherein the user equipment when configured to provide the option for the user to select a plurality of preference attributes is

further configured to provide an option of selecting a type of channel as a preference attribute.

334. (New) The system of claim 273 wherein the user equipment when configured to provide the option for the user to select a plurality of preference attributes is further configured to provide an option of selecting a program series as a preference attribute.

 335. (New) The system of claim 273 wherein the user equipment when configured to provide the option for the user to select a plurality of preference attributes is further configured to provide an option of selecting a genre of programming as a preference attribute.

336. (New) The system of claim 273 wherein the user equipment when configured to provide the option for the user to select a plurality of preference attributes is further configured to provide an option of selecting at least one rating as a preference attribute.

337. (New) The system of claim 273 wherein the user equipment when configured to provide the option for the user to select a plurality of preference attributes is

further configured to provide an option of selecting a given actor or actress as a preference attribute.

338. (New) The system of claim 273 wherein the user equipment when configured to provide the option for the user to select a plurality of preference attributes is further configured to provide an option of selecting a given topic as a preference attribute.

 339. (New) The system of claim 273 wherein the user equipment when configured to provide the option for the user to select a plurality of preference attributes is further configured to provide an option of selecting a word in a program description as a preference attribute.

340. (New) The system of claim 273 wherein the user equipment when configured to provide the option for the user to select a plurality of preference attributes is further configured to provide an option of selecting a given program start time as a preference attribute.

341. (New) The system of claim 273 wherein the user equipment when configured to provide the option for the user to select a plurality of preference attributes is

further configured to provide an option of selecting a range of broadcast times as a preference attribute.

342. (New) The system of claim 273 wherein the user equipment when configured to provide the option for the user to select a plurality of preference attributes is further configured to provide an option of selecting original programming as a preference attribute.

 343. (New) The system of claim 273 wherein the user equipment when configured to provide the option for the user to select a plurality of preference attributes is further configured to provide an option of selecting a given language as a preference attribute.

344. (New) The system of claim 273 wherein the user equipment when configured to provide the option for the user to select a plurality of preference attributes is further configured to provide an option of selecting a critics rating as a preference attribute.

345. (New) The system of claim 273 wherein the user equipment is further configured to provide an option

of deselecting at least one of the selected preference attributes.

346. (New) The system of claim 273 wherein the preference levels include at least like and dislike.

347. (New) The system of claim 273 wherein the preference levels include at least strong like and weak like.

 348. (New) The system of claim 273 wherein the preference levels include at least strong dislike and weak dislike.

349. (New) The system of claim 272 wherein the user equipment is further configured to provide an option for creating a master preference profile.

350. (New) The system of claim 272 wherein a plurality of preference profiles including a master preference profile are active, wherein the user equipment is further configured to resolve conflicts between preference profiles in favor of the master preference profile.

351. (New) The system of claim 272 wherein a master preference profile that is accessed by a master personal identification number is used to define certain television viewing preferences, wherein the user equipment is further configured to display the hot list of programs based on the master profile.

 352. (New) The system of claim 273 wherein a master preference profile that is accessed by a master personal identification number is used to define certain television viewing preferences, wherein the user equipment when configured to display the hot list of programs is further configured to display the hot list of programs based on selected preference attributes and selected preference levels in the master profile.

353. (New) The system of claim 272 wherein the user equipment is further configured to provide an opportunity for setting non-program settings associated with the preference profile.

354. (New) The system of claim 272 wherein the user equipment is further configured to provide an

opportunity for setting non-program settings associated with the preference profile, wherein the non-program settings include audio settings for the user television equipment.

355. (New) The system of claim 272 wherein the user equipment is further configured to provide an opportunity for setting non-program settings associated with the preference profile, wherein the non-program settings include display settings.

*As per*  
356. (New) The system of claim 272 wherein the user equipment is further configured to:

provide an opportunity for creating multiple preference profiles;

provide an option of selecting which of the profiles to make active; and

provide access to a messaging service based on information on which profile is active.

357. (New) The system of claim 272 wherein the hot list includes at least one program with an active non-expired reminder.

358. (New) The system of claim 272 wherein the user equipment is further configured to allow the user to tune to a program on the hot list.

359. (New) The system of claim 272 wherein the user equipment is further configured to allow the user to direct the television program guide system to display the hot list.

*By  
Emt*  
360. (New) Machine-readable media for use in a television program guide system in which an television program guide system is implemented on user television equipment, wherein the media is encoded with machine-readable instructions for performing the method comprising:

providing an option for a user to create a preference profile that is indicative of the user's television programming interests; and

displaying a hot list of programs on the user television equipment, wherein the programs on the hot list are based on the user's preference profile and are substantially currently available for viewing by the user.

361. (New) The machine-readable media of claim 360 wherein providing the option for the user to create the preference profile further comprises:

providing an option for the user to select a plurality of preference attributes that are indicative of the user's television programming interests; and

providing an option for the user to select one of at least several preference levels for each of the plurality of selected preference attributes, wherein the selected preference attributes and the selected preference levels are associated with the preference profile.

*362*

362. (New) The machine-readable media of claim 361 further encoded with machine-readable instructions for performing the method comprising providing an option of selecting a preference scope that is associated with the preference profile.

363. (New) The machine-readable media of claim 361 wherein there are multiple profiles, the media further encoded with machine-readable instructions for performing the method comprising providing an option of selecting which of the profiles to make active.

364. (New) The machine-readable media of claim 363 further encoded with machine-readable instructions for performing the method comprising turning on an auto-reminders feature.

365. (New) The machine-readable media of claim 364 wherein a given one of the profiles is active, the media further encoded with machine-readable instructions for performing the method comprising displaying automatic reminders when the auto-reminders feature is turned on based on the active profile just prior to the scheduled broadcast times of programs satisfying the active profile.

 366. (New) The machine-readable media of claim 365 further encoded with machine-readable instructions for performing the method comprising:

providing a view now option for programs for which automatic reminders are displayed; and

tuning to a given one of the programs for which the automatic reminders are displayed when the user selects the view now option for that program.

367. (New) The machine-readable media of claim 363 wherein at least two of the preference profiles are

active, and wherein displaying the hot list of programs based on the at least two preference profiles further comprises indicating which of the programs in the hot list of programs satisfy which of the preference profiles.

368. (New) The machine-readable media of claim 367 wherein indicating comprises listing the programs that satisfy one of the two profiles using one color and the programs that satisfy the other of the two profiles using another color.

 369. (New) The machine-readable media of claim 367 wherein indicating comprises listing the programs that satisfy one of the two profiles using one pattern and the programs that satisfy the other of the two profiles using another pattern.

370. (New) The machine-readable media of claim 367 wherein indicating comprises listing the programs that satisfy one of the two profiles using one icon and the programs that satisfy the other of the two profiles using another icon.

371. (New) The machine-readable media of claim 363 wherein displaying the hot list of programs further comprises displaying the hot list of programs based on the multiple profiles.

372. (New) The machine-readable media of claim 363 further encoded with machine-readable instructions for performing the method of allowing tuning to certain channels based on the multiple profiles.

 373. (New) The machine-readable media of claim 360 further encoded with machine-readable instructions for performing the method comprising allowing the user to tune to a selected program, wherein providing the option of creating the preference profile further comprises creating the preference profile based on characteristics of the selected program.

374. (New) The machine-readable media of claim 373 wherein creating the preference profile based on the characteristics of the selected program further comprises creating the preference profile based on the title of the selected program.

375. (New) The machine-readable media of claim 373 wherein creating the preference profile based on the characteristics of the selected program further comprises creating the preference profile based on the genre of the selected program.

376. (New) The machine-readable media of claim 373 wherein creating the preference profile based on the characteristics of the selected program further comprises creating the preference profile based on the channel of the selected program.

 377. (New) The machine-readable media of claim 373 wherein creating the preference profile based on the characteristics of the selected program further comprises creating the preference profile based on the rating of the selected program.

378. (New) The machine-readable media of claim 360 further encoded with machine-readable instructions for performing the method comprising allowing the user to highlight a given program listing, wherein providing the option of creating the preference profile further comprises

creating the preference profile based on characteristics of the highlighted program listing.

379. (New) The machine-readable media of claim 378 wherein creating the preference profile based on the characteristics of the highlighted program listing further comprises creating the preference profile based on the title of the highlighted program listing.

 380. (New) The machine-readable media of claim 378 wherein creating the preference profile based on the characteristics of the highlighted program listing further comprises creating the preference profile based on the genre of the highlighted program listing.

381. (New) The machine-readable media of claim 378 wherein creating the preference profile based on the characteristics of the highlighted program listing further comprises creating the preference profile based on the channel of the highlighted program listing.

382. (New) The machine-readable media of claim 378 wherein creating the preference profile based on the characteristics of the highlighted program listing further

comprises creating the preference profile based on the rating of the highlighted program listing.

383. (New) The machine-readable media of claim 360 further encoded with machine-readable instructions for performing the method comprising:

allowing the user to tune to a selected program; and

modifying a preference profile with which the selected preference attributes and the selected preference levels are associated based on the characteristics of the selected program.

B2  
cont

384. (New) The machine-readable media of claim 360 further encoded with machine-readable instructions for performing the method comprising:

allowing the user to highlight a given program listing; and

modifying a preference profile with which the selected preference attributes and the selected preference levels are associated based on the characteristics of the highlighted program listing.

385. (New) The machine-readable media of claim  
360 further encoded with machine-readable instructions for  
performing the method comprising providing a profiles  
display with which the user may modify a preference profile  
with which the selected preference attributes and the  
selected preference levels are associated.

386. (New) The machine-readable media of claim  
360 further encoded with machine-readable instructions for  
performing the method comprising providing an option for  
displaying the hot list a short time before the scheduled  
broadcast times of programs on the hot list and for  
adjusting this time.

387. (New) The machine-readable media of claim  
360 wherein displaying the hot list further comprises  
displaying the hot list sorted by start time.

388. (New) The machine-readable media of claim  
360 wherein displaying the hot list further comprises  
displaying the hot list sorted by channel.

389. (New) The machine-readable media of claim  
386 wherein displaying the hot list further comprises  
displaying the hot list sorted by priority.

390. (New) The machine-readable media of claim  
389 wherein displaying the hot list sorted by priority  
further comprises displaying the hot list with pay-per-view  
programming having highest priority and being listed first.

*B2  
CMT*  
391. (New) The machine-readable media of claim  
361 further encoded with machine-readable instructions for  
performing the method comprising allowing tuning to certain  
channels based on the selected preference attributes and  
selected preference levels.

392. (New) The machine-readable media of claim  
391 further encoded with machine-readable instructions for  
performing the method comprising providing an option of  
specifying a sort order for each of the selected preference  
attributes.

393. (New) The machine-readable media of claim  
392 further encoded with machine-readable instructions for

performing the method comprising allowing tuning to certain channels based on the specified sort order.

394. (New) The machine-readable media of claim 360 further encoded with machine-readable instructions for performing the method comprising monitoring which programs are watched by the user.

*B2  
CMT* 395. (New) The machine-readable media of claim 394 wherein monitoring which programs are watched by the user further comprises monitoring viewing times, channels, and frequencies.

396. (New) The machine-readable media of claim 394 further encoded with machine-readable instructions for performing the method comprising automatically modifying a preference profile based on which programs are watched by the user.

397. (New) The machine-readable media of claim 396 further encoded with machine-readable instructions for performing the method comprising providing an opportunity to review and modify automatic profile modifications made by the step of automatically modifying.

398. (New) The machine-readable media of claim 396 further encoded with machine-readable instructions for performing the method comprising disabling the step of automatically modifying.

399. (New) The machine-readable media of claim 360 further encoded with machine-readable instructions for performing the method comprising providing a personal identification number setup screen.

*B2  
CON*

400. (New) The machine-readable media of claim 399 wherein providing the personal identification number setup screen further comprises providing a plurality of personal identification number options associated with a preference profile.

401. (New) The machine-readable media of claim 400 wherein providing the personal identification number options further comprises setting whether a personal identification number is required for activating the profile.

402. (New) The machine-readable media of claim 400 wherein providing the personal identification number options further comprises setting whether a personal identification number is required for deactivating the profile.

403. (New) The machine-readable media of claim 361 further encoded with machine-readable instructions for performing the method comprising providing a personal identification number setup screen, wherein providing the personal identification number options further comprises:

*B2  
Cmt*

providing a plurality of personal identification number options associated with a preference profile with which the selected preference attributes and the selected preference levels are associated; and

setting whether a personal identification number is required for viewing which preference attributes are associated with the profile.

404. (New) The machine-readable media of claim 361 further encoded with machine-readable instructions for performing the method comprising providing a personal identification number setup screen, wherein providing the personal identification number options further comprises:

providing a plurality of personal identification number options associated with a preference profile with which the selected preference attributes and the selected preference levels are associated; and

setting whether a personal identification number is required for modifying which preference attributes have an associated preference level of illegal.

405. (New) The machine-readable media of claim 361 further encoded with machine-readable instructions for performing the method comprising providing a personal identification number setup screen, wherein providing the personal identification number options further comprises:

providing a plurality of personal identification number options associated with a preference profile with which the selected preference attributes and the selected preference levels are associated; and

setting whether a personal identification number is required for modifying which preference attributes have an associated preference level of mandatory.

406. (New) The machine-readable media of claim 361 further encoded with machine-readable instructions for

performing the method comprising providing a personal identification number setup screen, wherein providing the personal identification number options further comprises:

providing a plurality of personal identification number options associated with a preference profile with which the selected preference attributes and the selected preference levels are associated; and

setting whether a personal identification number is required for modifying like and dislike preference levels.

*22 cont*

407. (New) The machine-readable media of claim 361 wherein providing the option for the user to select a plurality of preference attributes further comprises providing an option of selecting a given airing of a program as a preference attribute.

408. (New) The machine-readable media of claim 231 further comprising allowing the given airing of the program selected as a preference attribute to expire after the program has been aired.

409. (New) The machine-readable media of claim 361 wherein providing the option for the user to select a

plurality of preference attributes further comprises providing an option of selecting a broadcast characteristic as a preference attribute.

410. (New) The machine-readable media of claim 409 wherein providing the option of selecting a broadcast characteristic as a preference attribute further comprises providing closed-captioning as a preference attribute.

 411. (New) The machine-readable media of claim 409 wherein providing the option of selecting a broadcast characteristic as a preference attribute further comprises providing second audio program as a preference attribute.

412. (New) The machine-readable media of claim 361 further encoded with machine-readable instructions for performing the method comprising providing an option of specifying a sort order for each of the selected preference attributes.

413. (New) The machine-readable media of claim 236 further encoded with machine-readable instructions for

performing the method comprising displaying the list of programming based on the specified sort order.

414. (New) The machine-readable media of claim 361 further encoded with machine-readable instructions for performing the method comprising providing the user with an option of selecting a preference scope.

 415. (New) The machine-readable media of claim 414 further encoded with machine-readable instructions for performing the method comprising displaying the list of programming based on the selected preference scope.

416. (New) The machine-readable media of claim 414 further comprising allowing tuning to certain channels based on the selected preference scope.

417. (New) The machine-readable media of claim 414 wherein providing the user with the option of selecting the preference scope further comprises selecting a preference scope selected from the group consisting of: narrow scope, moderate scope, and wide scope.

418. (New) The machine-readable media of claim 414 wherein the preference levels include like, dislike, illegal, and mandatory, and wherein providing the user with the option of selecting the preference scope further comprises selecting a preference scope that includes liked programs that are not more disliked and that have all mandatory attributes and no illegal attributes.
